CREACIÓN DE CLUSTER CON GLUSTERFS

Instalamos glusterfs en las dos maquinas

Asignamos ips en la misma red y comprobamos ping

Le damos formato a los discos secundarios y los montamos en la carpeta creada brick1

Montamos los discos automáticamente con el fstab

Comprobamos

En la maquina 1 configuramos la 2ª maquina como peer y comprobamos con peer status

Creamos el cluster con los discos montados en las carpetas brick1

EnekoUbuServ clonar Samba [Corriendo] - Oracle VirtualBox

Archivo Máquina Ver Entrada Dispositivos Ayuda

```
root@eneko:/home/eneko# gluster volume create backup replica 2 192.168.10.111:/gluster/brick1 192.168.10.222:/gluster/brick1 force
volume create: backup: failed: Volume backup already exists
root@eneko:/home/eneko# gluster volume start backup
volume start: backup: failed: Volume backup already started
root@eneko:/home/eneko# _
```

Automatizamos con fstab

EnekoUbuServ clonar Samba [Corriendo] - Oracle VirtualBox
